

Smart Capital

Smart Capital Funds P/L was founded in 2008 by AGSE graduate, Paul Bitetto (MEI Hons) after an initial search for a better way to fund his own ventures and pursue the commercialization game. The company underwent some interesting changes for the better in 2009 and in 2010 The Smart Capital Group (SCG) was launched as an information portal for our investor networks and companies.

The Smart Capital Group help connect entrepreneurs and innovative businesses with investors and capital funds. Smart Money is key to the success of any venture, and we ensure that our clients receive accurate and fair information to be able to integrate their financing needs into their overall corporate strategy, and receive funds with an equal amount of business intelligence, development, and connection to their markets and customers.

Our business in essence is making connections through marketing and investor relations. Our team has grown and part of our network now extends across international borders, providing access to investor networks in Europe and the Asia-Pacific.
